**Subject:** Microsoft suit

Yet another Federal Judge has misunderstood the Microsoft situation. I have owned apples and IBM compatibles. I've worked with dos, Windows, & Linux. Microsoft simply has a superior product. I was very happy to have a free browser included. In point of fact, I prefer Netscape, so I downloaded that with Microsoft's free browser and was in business in a few minutes.

My state (Iowa) has made a bad decision based on politics and not on fact. The settlement should be approved because the suit is ill founded and harmful to our economy. If anyone cares what this one individual thinks, there it is.
